Corps of Engineers work this week will close one lane on U.S. 83 at Lake Sakakawea

Beginning Friday, Sept. 4, the U.S. Army Corps of Engineers will be working near the shoulder of the southbound lane on U.S. Highway 83 about a quarter mile south of the Snake Creek pumping plant. The work will require closing the shoulder and outside lane of Highway 83. The inside lane will remain open, and the two northbound lanes will not be affected.

Workers for the U.S. Army Corps of Engineers will be replacing some monitoring instruments along the bank of Lake Sakakawea. The project is scheduled to be completed before the end of September.
